

EP801

THE LEADER IN LONG RANGE CORDLESS PHONES

Extreme Range Single Line Cordless Telephone

Extreme Range Cordless

Offers more coverage than any other consumer rated cordless telephone in Pan-Europe.

2-Way Radio

Multi-functional cordless system offers walkie talkie like functionality which operates independent of the base station. Users can take the EP801 handsets with them for a handy quick and efficient alternative to communications.

WiFi Compatible

The EP801 will not interfere with today's wireless networks, unlike your traditional 2.4 or 5.8 Mhz models available in today's market.

- Superior Multi Floor Coverage.
- Penetrates Concrete, Wood and Drywall
- More Range than 2.4 or 5.8 Ghz
- Outperforms all DECT solutions
- Expandable to (9) additional handsets
- Expandable to (4) additional bases
- Built in 2-Way Radio between handsets
- Built in handset broadcast system
- Base station dialing w/speakerphone
- CE Compliant

Coverage: Up to 25,000 square feet; 6 floors of penetration; 10 acres

2.4 G/5.8 GHz Cordless

1.9 GHz DECT
