MIDLAND G9 PLUS**C923.05**

New version of the glorious MIDLAND G9.

MIDLAND G9 PLUS is a multi-task transceiver, with compact design and practical to take it everywhere. Robust radio, it can used even in extreme activities.

G9 PLUS possesses new features such as the **'Side Tone' function**, that eliminates the noise at the end of transmissions and **the audio quality considerably improved** to make communications clearer.

COMPLYING TO CE/99/05

Main features

- G9 PLUS: Dual Band LPD/PMR446 transceiver – G9E PLUS : PMR446 only
- Channels: PMR446: 8+16 pre-set / LPD: 69
- Tones: 38 CTCSS / 104 DCS
- **Dual PTT for high/low output power:** to reduce the battery consumption, the radio transmits in high power only when it is really necessary;
- **Antenna 12 cm long:** to get the best performances;
- **Emergency function:** to communicate with all radios equipped with this function (G8 and G9), even though they are tuned on different channels;
- **Manual Out of range control:** to know if there are some radios within your range;
- **Out of Range function:** to verify if a couple of radios remains within the range;
- **High/low power selection**
- **Vox Talk Back function:** if one radio is continuously transmitting in VOX, the Vox TB automatically stops the transmission after 20" to let other users transmit, too;
- Dual Watch function
- **Vibracall function**
- Keypad lock to avoid accidental pressures
- Auto power save
- Low battery indicator
- SCAN function
- CALL with 5 selectable melodies
- Monitor
- Roger Beep
- Jack for ext. mike / ext. speaker / battery pack recharge
- 2 Pin accessories jack
